BUSINESS SUMMARY

CoreWeave, the AI Hyperscaler™, delivers a cloud platform of cutting-edge software powering the next wave of AI. The company's technology provides enterprises and leading AI labs with cloud solutions for accelerated computing. Since 2017, CoreWeave has operated a growing footprint of data centers across the US and Europe.

CoreWeave is a cloud purpose-built for scaling, supporting, and accelerating GenAI. We're a comprehensive platform and strategic partner designed to tackle today—and tomorrow's—challenges of deploying AI at scale. We manage the complexities of AI growth to make supercomputing accessible and push the limits of what's possible. Our teams create modern solutions to support modern technology. Get the premier choice for working with GenAI workloads.

AI INFRASTRUCTURE

Powering AI at supercomputing scale

From the way we design our GPU clusters accelerated by NVIDIA to the expert teams on site, CoreWeave offers one of the most performant, reliable, and resilient AI infrastructures on the market. What was once only possible via years of planning and development of on-prem clusters is now available in the cloud with CoreWeave.

Modern infrastructure for compute-intensive AI workloads

Up to 65% of effective compute capacity embedded in GPUs is lost to system inefficiencies. CoreWeave data centers are specifically designed with AI in mind, featuring powerful and sophisticated infrastructure solutions across networking, storage, NVIDIA GPU cluster architectures, and beyond. The result: up to 20% higher GPU cluster performance than alternative solutions.

Global coverage

CoreWeave's infrastructure is available via flexible public or dedicated cloud deployments in over 32 data centers in North America and Europe, with hundreds of megawatts of capacity.

For private, hyper-performant connections needed to access data quickly and securely, CoreWeave offers Direct Connects over our managed network backbone and on-ramp locations across large geographic markets via network POPs.

Built for efficiency

Up to 65% of effective compute capacity embedded in GPUs is lost to system inefficiencies.

CoreWeave Cloud was purpose-built for AI, delivering up to 20% higher GPU cluster performance than alternative solutions.

Recent Press Releases *(Headlines and Excerpts)*

CoreWeave Appoints New Chief Marketing Officer Jean English

English brings over a decade of CMO experience from leading cloud, AI, and cybersecurity companies including IBM and Palo Alto Networks

March 24, 2025 -- [CoreWeave](#) announced it has appointed Jean English as Chief Marketing Officer. With over a decade of CMO experience at several cloud, AI, and cybersecurity leaders, English has established a track record of executing data-driven, multi-channel marketing and communications campaigns supporting sustainable sales and product growth in the U.S. and abroad.

English brings over 20 years of marketing and communications leadership, with a decade as CMO at leading cloud, AI, and cybersecurity companies. Most recently, she was CMO at Juniper Networks, known for its AI-native networking platform, where she focused on driving global growth in the enterprise segment. English has also served as CMO at Palo Alto Networks, a global leader in cybersecurity; NetApp, a pioneer in cloud data services and storage; and IBM's Asia Pacific division, where she led initiatives to accelerate growth in cloud and cognitive computing. At IBM, she spent over 10 years in marketing leadership, ultimately serving as VP of Global Marketing for IBM Cloud, where she helped to drive the transformation of its multi-billion-dollar Cloud as a Service business.

CoreWeave Announces Agreement with OpenAI to Deliver AI Infrastructure

CoreWeave to provide dedicated compute capacity for OpenAI's model training and services

March 10, 2025 -- [CoreWeave](#) announced a deal to deliver AI infrastructure to OpenAI, expanding OpenAI's compute capacity for training and delivering its latest models at scale to its hundreds of millions of users around the world. The contract value for this strategic deal is up to \$11.9 billion. As part of this deal, OpenAI will become an investor in CoreWeave through the issuance of \$350.0 million of CoreWeave stock.

CoreWeave to Acquire Weights & Biases - Industry Leading AI Developer Platform for Building and Deploying AI Applications

Acquisition to create end-to-end platform for AI labs and enterprises to bring new innovations to market faster

March 4, 2025 -- [CoreWeave](#) announced it has reached an agreement to acquire Weights & Biases, a leading AI developer platform. The acquisition extends CoreWeave's purpose-built cloud platform by enabling an end-to-end experience for customers, enhancing functionality for the world's leading AI labs and enterprises to build, tune and deploy AI applications.

The transaction combines CoreWeave's infrastructure and managed cloud services with the Weights & Biases AI developer platform for AI model training and AI application evaluation and monitoring. Collectively, CoreWeave and Weights & Biases intend to provide customers with a powerful application development workflow to accelerate AI roadmaps and bring innovations to market faster. The combination will result in one team dedicated to customers with intense focus on the end-user experience and productivity. CoreWeave plans to bring new innovations to the Weights & Biases platform while maintaining the functionality and dependability that users know and love. Weights & Biases' customers will also be able to continue deploying workloads wherever they like, be it on-premise or with the infrastructure provider of their choice.

Weights & Biases was founded in 2017 by Lukas Biewald, Chris Van Pelt, and Shawn Lewis, on a mission to build the best tools for AI developers. Since then, the company has become a leading player in the MLOps and LLMOps space with a platform used by over 1 million AI engineers. Its trusted software products are used industry-wide by marquee enterprises, including OpenAI, Meta, NVIDIA, Snowflake, AstraZeneca, Toyota, Canva, Square, and Wayve to build and train AI models and develop and deploy AI applications.
