## BUSINESS SUMMARY

Lumen connects the world. Lumen ignites business growth by connecting people, data, and applications – quickly, securely, and effortlessly. Everything we do at Lumen takes advantage of our network strength. From metro connectivity to long-haul data transport to our edge cloud, security, and managed service capabilities, we meet our customers' needs today and as they build for tomorrow.

## SOLUTIONS

IT leaders continuously face the challenge of finding new ways to drive growth, struggling with complex legacy technologies that fail to deliver the speed and ease of use for their users. Lumen is disrupting this outdated model by co-creating solutions that are quick, secure and effortless.

### **Lumen unveils AI-powered threat defense tool for businesses**

#### ***Lumen Defender uses Black Lotus Labs' threat intelligence to proactively stop attacks at the network edge***

May 1, 2024 -- To combat the growing number of cyberattacks targeting business networks, Lumen Technologies is unveiling a new threat defense tool driven by Artificial Intelligence (AI)/Machine Learning (ML). Lumen DefenderSM powered by Black Lotus Labs® is a patented product that proactively blocks evolving threats at the network edge, before they can compromise a business's network perimeter. Black Lotus Labs, Lumen's threat research team, leverages its unique visibility into Lumen's global internet backbone using ML algorithms to generate threat intelligence that detects malicious infrastructure being used by cybercriminals and nation state actors.

#### **Lumen Black Lotus Labs' latest threat discovery**

Black Lotus Labs analyzes 200 billion NetFlow sessions (network communication records) every day across Lumen's global network with the ability to detect various cyberattacks several days before others in the industry. The team recently tracked new malware targeting business routers dubbed "Cuttlefish." This stealthy malware lurks in infected devices, observing all traffic and waiting for an opportunity to strike. Lumen Defender can automatically prevent these infections, protecting business networks and enabling business continuity. For detailed technical analysis of "Cuttlefish," read our latest blog: <https://blog.lumen.com/eight-arms-to-hold-you-the-cuttlefish-malware>

#### **How Lumen Defender works**

Lumen Defender identifies hosts (devices) used by criminal organizations and nation state actors and blocks all traffic between those risky IP addresses and customer networks, without the need for additional hardware.

Customers can view blocked threats and manage the service from an easy-to-use web portal.

Lumen Defender is a simple add-on to Lumen Dedicated Internet Access (DIA) and Lumen Internet On-Demand services.
